

Speak with all kinds of different IT with a configurable and flexible message broker for electronic data exchange.

Spec Sheet

IT IS enbex is a **.NET**-based communication system for reliable and cost effective electronic data exchange.

The main advantage of IT IS enbex is electronic data transfer of B2B documents and the conversion of such documents in various formats. Furthermore IT IS enbex allows an exchange of data from NAV with different other systems and supports

various forms of digital signature.

IT IS enbex is **XML**, **EDI-fact** and **flat file** compatible and offers the participants a configurable interface for the definition of fields and formats. IT IS enbex comes with protocols like http or https, SMTP, FTP and can manage some 1000 transmissions per minute (dependent on hardware and document size).

The News and facts at a glance:

- ↗ exchange of data from NAV with other various systems
- ↗ Hardware appliance with preinstalled solution is available
