

**Now with web shop and
 internet portal:
 IT IS activigence
 web extensions 2006**

Spec sheet

IT IS activigence® web extensions bases on the technology of IT IS activigence and IT IS mobiligence. With IT IS activigence web extensions you get a freely configurable web interface for Microsoft Dynamics NAV/AX to design shops, information portals

and more. It will take just a few hours to add a fully functional webshop can be added to your Dynamics NAV/AX system. Moreover, the system saves big on cost: you only need just a Microsoft Server (version 2000 or 2003) for the front end - even if it's hosted.

Overview of the advantages and facts:

- Web Shop on the fly: Use a shop system with login, various catalogues, search, shopping basket, checkout with delivery and payment selections, order lists, invoices and shipping slips and much more. Extensions are quickly done by configuration in Dynamics, so no need to program.
- Just basic Windows Web Server needed for the front end.
- Global search for items including the fantastic Fuzzy search forgiving mistyping.
- Web parts allow the design of the portals by drag 'n drop. Default and Custom actions can trigger code in the Microsoft Dynamics ERP system
- High-class internet portal through integration of functionalities of the ERP systems, such as price calculus, data for invoices, delivery address, etc.
- Modules to design the user interface by .Net WebPart technology
- Highest security solutions with encrypted and digitally signed servers. Since front- and back end are separated, the solution runs in a hosted environment, too.
- Display any language, because IT IS activigence WE supports multilanguage

Technical requirements:

- Microsoft® Dynamics® NAV 3.70 and up (database: Native or SQL) and/or Microsoft Dynamics AX 3.0 (and higher) database for the back-end system
- Navision Application Server and/or Axapta Business Connector providing communication
- Microsoft Windows 2000 Server SP3 or Windows Server 2003 as front end server
- Internet Information Server 5.0 or higher with ASP.Net 2.0 and Microsoft Message Queue
- Microsoft SQL Server 2005 Express Edition or better (Front End database)
- Browser support for Microsoft Internet Explorer Version 5.5 and higher
- Browser support for Mozilla® Firefox 1.5 and higher
