IT IS activigence 2007

The ultimate solution for Microsoft Dynamics® NAV/AX and Microsoft® Office SharePoint Server 2007 and Windows SharePoint Services 3.0

spec sheet

Document management and business processes should be fast, flexible, and seamless. We give you the environment you need. IT IS activigence 2007 is the new version for today's web-based business solutions. Now you can work the way you want, combine business data and documents. With a stunning amount of 46 new features over our very successful former version, you will see your business productivity in a new light. By using new technologies like AJAX, we accelerate the user experience and data processing in a convenient and secure way.

The news at a glance:

- ↗ New and simplified role based configuration
- ↗ Fast, convenient and secure business processing with AJAX-technology
- ↗ Direct online data access to the NAV system from/to other applications
- ↗ High-speed order entry and tracking
- ↗ Advanced reporting system: web preview with pictures, report processing feedback for users, and options to constitute the reports
- ↗ Explicit, role based messages in subject to the request
- ↗ Enlarged search: search results can be displayed in defined groups or alphabetical or sorted by date or sorted by order number

The solid foundation: IT IS activigence builds your intranet and extranet portal with integration of business process functionality and ERP data

- ↗ Full featured client for Microsoft Dynamics ERP system
- ↗ Instant site feature automatically creates sites when you need them - for example when you insert new customer data.
- ↗ Search your business system regardless where the data are – retrieve and link
- ↗ Document management from Dynamics places orders, invoices, etc. as PDF
- ↗ Modular and task oriented user interface with .NET web part technology
- ↗ WebPart permits in-line editing in tables and triggers into Microsoft Dynamics
- ↗ Multi-languange out of the box for foreign character sets, too
- ↗ Access to all relevant information with only one central user verification process at your companies intranet portal or the partner extranet

Technical requirements:

- ↗ ERP backend system Microsoft Dynamics NAV Version 3.70 and up or AX Version 3.0 and up.
- ↗ NAV Application Server(s) (NAS) or AX COM connector
- ↗ Microsoft Windows Server 2003 with Windows SharePoint Services 3 or Microsoft Office SharePoint Server 2007
- ↗ Internet Explorer Version 5.5 and up, some functionality might require the most current browser
- ↗ Microsoft Office 2003/2007 recommended for SharePoint usage
- ↗ Adobe Acrobat Reader recommended for PDF documents
